

Manage data

You need to be logged in (*see the dedicated account guidelines for instructions on how to register and log in*). This walkthrough builds two personal datasets from the public chant list — **Graduals** (genre **Gr**) and **Tracts** (genre **Tc**) — edits a melody, then uploads a CSV copy and deletes that copy.

CantusCorpus v1.0 is the main shared corpus. ChantLab may also list other shared default corpora. Those entries are marked **shared** and cannot be deleted; they are available to every account. Only datasets you create or upload yourself can be removed.

1. Filter the chant list

Open **Filter search**. Leave **Hide incomplete chants** and **Hide chants without Volpiano** checked.

Genre and office labels are short codes. The two genres used in this guide:

Code	Meaning
Gr	Gradual
Tc	Tract

The full lists are on the Cantus Database: [genre abbreviations](#) and [service \(office\) abbreviations](#).

1. Under **Genres**, uncheck **All**, then check **Gr**.
2. Leave **Offices** and **Fontes** as they are, unless you want to narrow the manuscripts.
3. Click **Apply filters and refresh**.

Confirm the **Filters updated** dialog with **OK**.

The table now lists graduals only (Genre **Gradual**). You can collapse **Filter search** with the arrow so the table has more room.

2. Create a dataset from the filtered selection

Export to CSV (under the table) downloads the ticked rows as a `dataset.csv` in the CantusCorpus v1.0 format. You can use that file later to upload. **Create Dataset** copies the same selection into a new personal dataset.

1. Click **Select/deselect all**.
2. Click **Create Dataset**.
3. Name it `Graduals`.
4. Click **Confirm**.

3. Pick the dataset and save

The chant list only shows sources that are checked in **Data sources**.

1. Open the **Data sources** panel if it is collapsed.
2. Uncheck the shared default corpora.
3. Check **Graduals**.
4. Click **Save**.

The screenshot shows the 'Chant list' interface. At the top is a navigation bar with links: Home, Chant list, Manage data, Manage alignments, Dashboard, Settings, and About. The user is logged in as 'docsguide882194' and can click 'Logout'. A search bar labeled 'Search incipit' is on the right. The main table lists 18 chants, each with a checked checkbox in the first column. The table columns are: Incipit, ID, Title, Type, and Source. A 'Data sources' panel is open on the right, showing a list of sources with checkboxes: CantusCorpus v1.0, netvor-0.3, Graduals (checked), and Tracts. A 'Save' button is at the bottom of the panel. At the bottom of the table, there are buttons for 'Export to CSV', 'Create Dataset', and 'Add to dataset'. A pagination bar shows 'Items per page: 20' and '1 - 20 of 38'.

Data sources

4. Edit Volpiano and save

Click an **Incipit** in your dataset. Because you own these rows, **Raw volpiano** is editable and **Update volpiano** is shown.

Details

<https://cantusdatabase.org/chant/638772>

[Update volpiano](#)

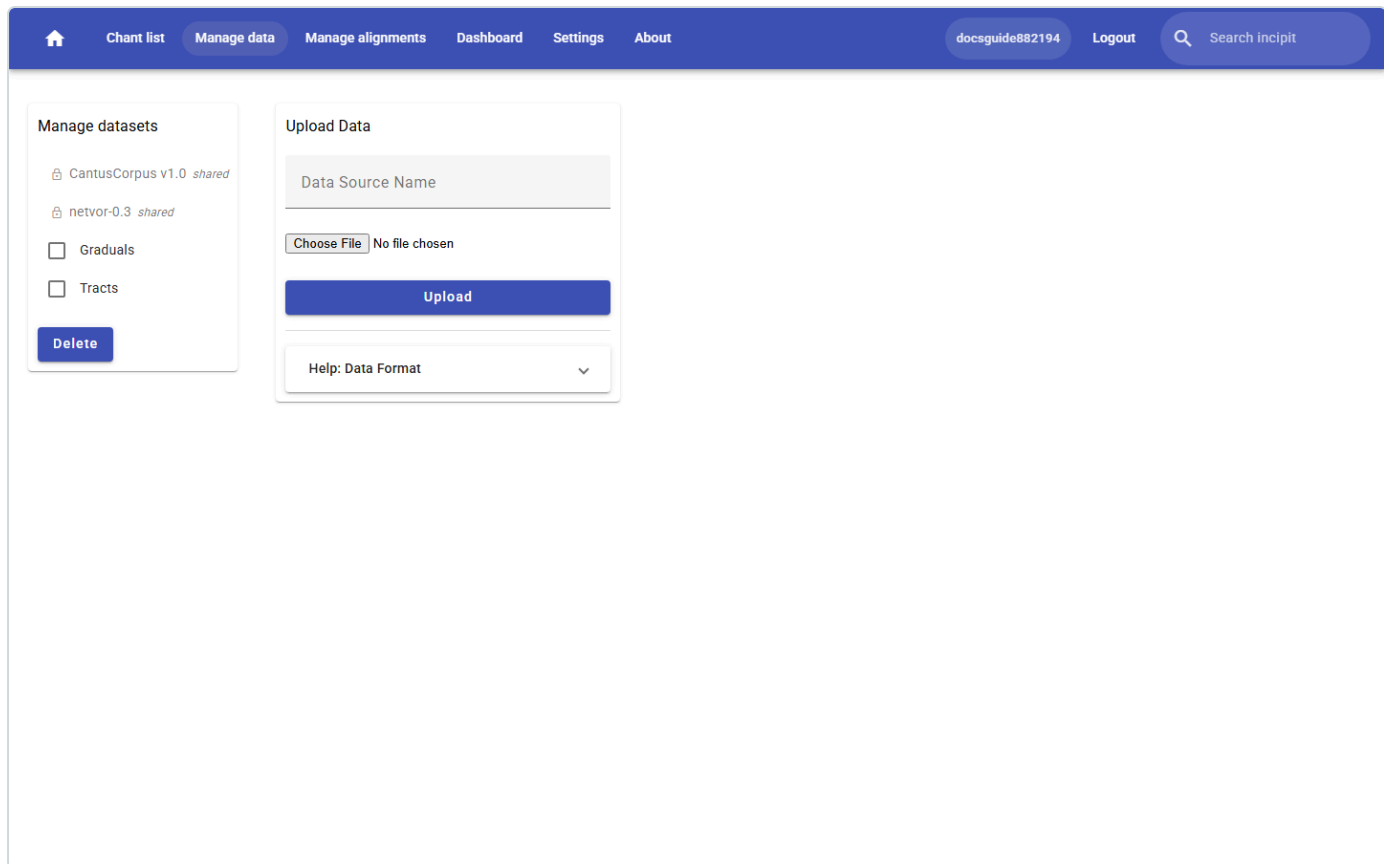

Change the string if needed, click **Update volpiano**, then **OK** on **Volpiano updated successfully**.

The screenshot shows the Cantus database interface for the chant CH-P 18, 113. The top navigation bar includes links for Home, Chant list, Manage data, Manage alignments, Dashboard, Settings, and About. A user profile 'docsguide882194' and a 'Logout' button are on the right, along with a search incipit field. The main content area displays the chant title 'CH-P 18, 113' and a musical score. Below the score, the 'Raw volpiano' is shown as '1--c--c--eF--f--hf-gh-fd-ge-|'. The 'Full text' is 'Ab occultis meis munda me domine et ab alienis parce servo tuo'. The 'Genre' is 'Gradual' and the 'Source' is 'CH-P 18 (1100 - 1199)'. The 'Cantus ID' is 'g00760'. A 'Details' link points to 'https://cantusdatabase.org/chant/638772'. An 'Update volpiano' button is at the bottom left. A confirmation message 'Volpiano updated successfully' is displayed in a white box with a mouse cursor pointing to it.

Use the home icon or **Chant list** to return.

5. Upload a CSV, then delete that copy

Open **Manage data**. The left card lists your datasets. Shared defaults are marked **shared** and have no checkbox — they cannot be deleted. **Graduals** and **Tracts** should already be there from section 2.

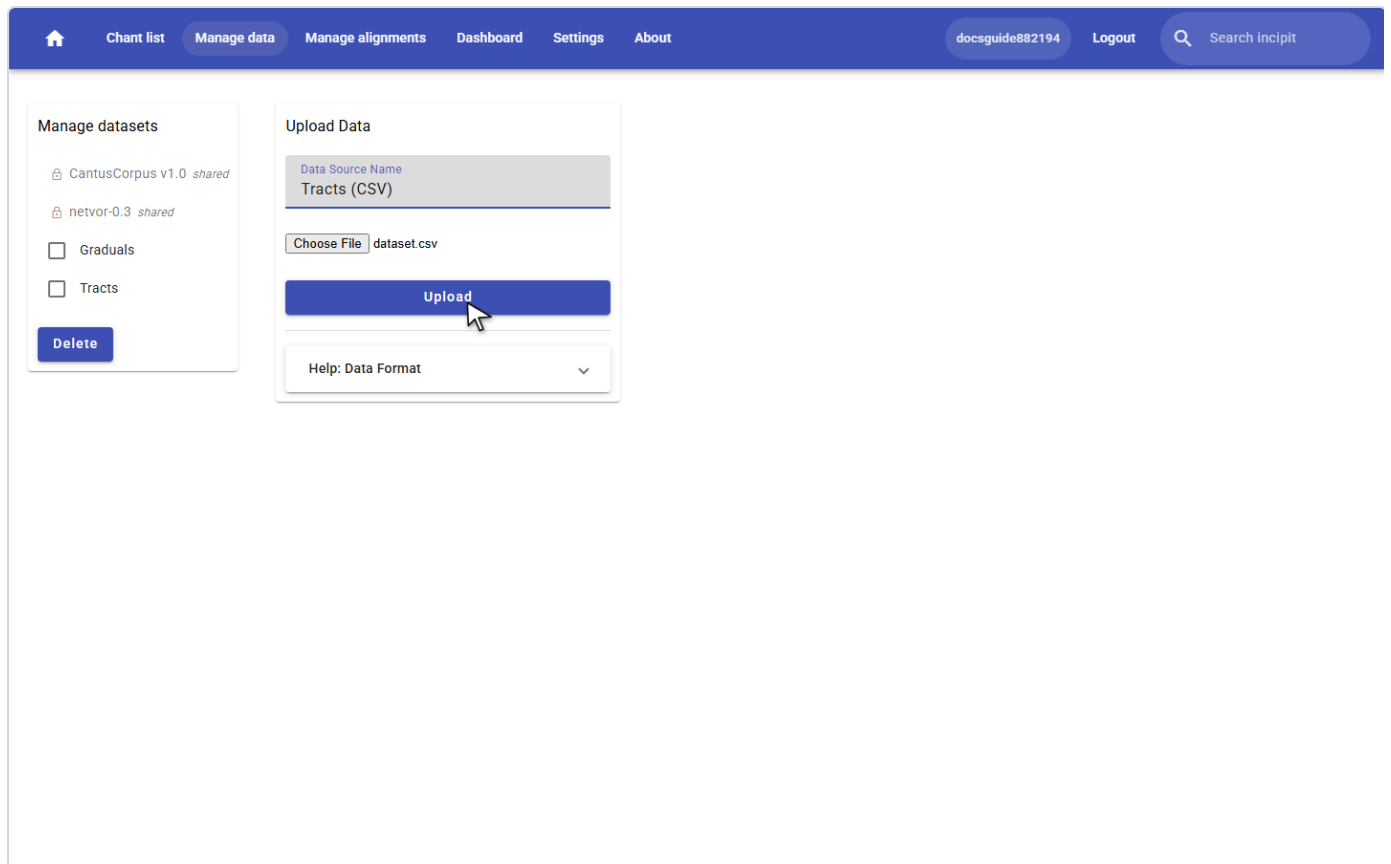

The right card uploads a new dataset from a CSV file. Use the `dataset.csv` you exported from the tracts selection.

1. Type a **Data Source Name**. It must not already exist on your account — for example `Tracts (CSV)` if you already created **Tracts** from the list.
2. Choose the `.csv` file.
3. Click **Upload**.

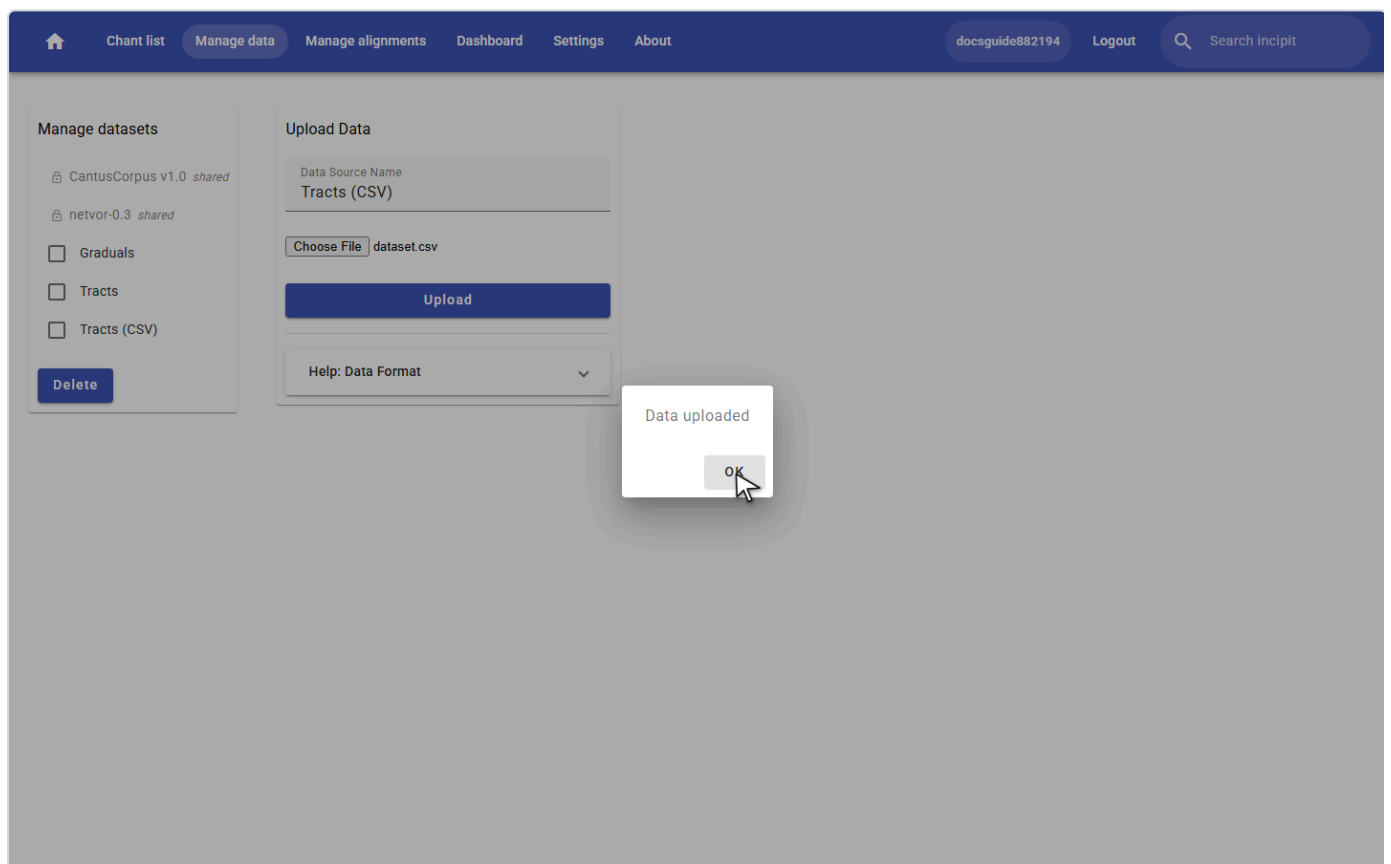

Open **Help: Data Format** for the expected columns. The first line of the CSV must be the header; do not upload data rows only. The safest template is a file downloaded from **Chant list** with **Export to CSV**. That export uses the CantusCorpus v1.0 column names.

Recommended v1.0 columns: `chantlink`, `incipit`, `cantus_id`, `mode`, `siglum`, `position`, `folio`, `sequence`, `feast`, `feast_code`, `genre`, `office`, `srclink`, `melody_id`, `full_text`, `melody`, `db`, `image`.

None of these are strictly required for a ChantLab upload — missing cells are stored empty, and unknown extra columns are ignored. Older Cantus Corpus / ChantLab names (`id` / `drupal_path`, `source_id`, `notes`, `volpiano`, `feast_id` / `genre_id` / `office_id`) are mapped automatically. `volpiano` is stored as `melody`. `dataset_name` in the file is replaced by the name you type in the form.

When the upload finishes, you get **Data uploaded**. Click **OK**.

Go back to **Chant list** and open **Data sources**. The uploaded name is now listed on the right, next to **Graduals**, **Tracts**, and the shared corpora.
