

Alignment

You can run an alignment while logged out, but you must be logged in to **Save** it and later reopen it under **Manage alignments** (see the dedicated guidelines for accounts). This walkthrough uses Gradual and Tract datasets (see the dedicated data management guidelines for instructions on how to create such datasets).

This guideline first show how to align **Tracts** by pitches: colours and display modes, saving and downloads, the guide tree, the distance matrix, and a snapshot. It then runs a concatenated pitch alignment on **Graduals** with phylogenetic analysis. In the end we show how to use **Manage alignments** tab (reopen, delete, or upload a saved JSON).

Tracts

1. Pick Tracts and select all

The chant list only shows sources that are checked in **Data sources**.

1. Open the **Data sources** panel if it is collapsed.
2. Uncheck the shared default corpora.
3. Check **Tracts**.
4. Click **Save**.

The screenshot shows the ChantLab interface. At the top is a navigation bar with tabs: Chant list, Manage data, Manage alignments, Dashboard, Settings, and About. The 'Chant list' tab is active. Below the navigation bar is a table of chants. To the right of the table is a 'Data sources' panel. The panel has a search bar and a list of sources with checkboxes. The 'Tracts' source is checked, and a 'Save' button is visible. At the bottom of the interface are buttons for 'Export to CSV', 'Create Dataset', and 'Add to dataset'.

Export to CSV Create Dataset Add to dataset

Confirm **Source selection saved**. The table now contains only chants from that dataset.

Click **Select/deselect all**. That ticks every chant in the dataset, not only the rows on the current page. The **(Selected: ...)** counter updates.

Alignment warning

The chant text and the melody do not have the same number of words or syllables, so they cannot be underlaid correctly.

INCLUDED IN THE ALIGNMENT

Displayed with incomplete text underlay.

* Veni sponsa [Christi accipe coronam

All selected chants remain in the alignment.

OK

Each block is one aligned sequence. The title is a number plus a short name built from incipit, source and a mode. Click the title to open chant details.

3. Colours and display modes

The left **Display options** and **Display mode** controls change how the same alignment is drawn. They do not recompute it.

Check **Show colors**. Matching pitches across sequences share a colour, so conserved notes and gaps stand out. **Show conservation** is an alternative colouring (the two checkboxes replace each other).

The screenshot shows the Incipit web application interface. At the top is a navigation bar with links: Home, Chant list, Manage data, Manage alignments, Dashboard, Settings, and About. On the right of the navigation bar are the user identifier 'docsguide882194', a 'Logout' button, and a search bar labeled 'Search incipit'. Below the navigation bar, the 'Display options' section on the left contains four checkboxes: 'Show headers' (checked), 'Show text' (checked), 'Show colors' (checked, with a mouse cursor hovering over it), and 'Show conservation' (unchecked). Below these is an unchecked 'Segment words' checkbox. The 'Display mode' section next to it shows 'Volpiano' selected with a checkmark, and 'Raw' as an alternative. Below 'Volpiano' is the text '38 sequences'. Further down, there are two buttons: 'Notes' (selected with a checkmark) and 'All'. To the right of these controls is a row of buttons: 'Save', 'Download Alignment JSON', 'Download FASTA', and 'Download Newick'. Below these are three more buttons: 'Distance Matrix', 'Download Distance Matrix', and 'Guide Tree'. At the bottom of this control area is a button labeled 'Download Alignment Snapshot PNG' and another labeled 'Reduce to Contrafacts'. A prominent pink button labeled 'Phylogenetic Analysis' is located below the 'Display mode' section. The main area of the interface displays four musical staves, each representing a different chant. Each staff has a title: 1: Absolve domine animas omnium fidelium US-STu MSS CODEX 0734 FF 778051 mode 8; 2: Attende caelum et loquar et CH-P 18 777856 mode 8; 3: Vineam factam dilectam in CH-P 18 778818 mode 8; 4: Cantemus domino gloriose enim honorificatus CH-P 18 390637 mode 8. Each staff shows a musical score with notes and vertical colored bars indicating pitch alignment across the different sequences. The colors used include orange, green, purple, and blue.

Show headers, **Show text**, and **Segment words** toggle names, lyrics, and word bars.

With display mode **Volpiano**, a second toggle appears:

- **Notes** — only note characters (the default)
- **All** — also bars, clefs, and other Volpiano punctuation

Switch **Display mode** to **Raw** to see the aligned strings in a monospace encoding instead of the Volpiano font.

4. Save and download

Save stores the alignment on your account so you can reopen it under **Manage alignments**. Enter a name and **Confirm**.

This screenshot shows the 'Chant list' interface. The top navigation bar includes 'Chant list', 'Manage data', 'Manage alignments', 'Dashboard', 'Settings', and 'About'. A user identifier 'docsguide882194' and a 'Logout' button are on the right. Below the navigation bar, there are 'Display options' (Show headers, Show text, Show colors, Show conservation, Segment words) and 'Display mode' (Volpiano, Raw, 38 sequences, Notes, All). A 'Phylogenetic Analysis' button is visible. The main area displays four chant sequences with their lyrics and musical notation. The 'Save' button is highlighted with a mouse cursor.

This screenshot shows the same 'Chant list' interface, but with a confirmation dialog box open over the 'Save' button. The dialog box is titled 'Enter alignment name' and contains a text input field with the value '1 alignment (docs) 1686'. Below the input field is a 'Confirm' button. The background interface is dimmed.

The functionality of other buttons next to the **Save** button:

Button	What it does
Download Alignment JSON	Full ChantLab alignment (can be uploaded again under Manage alignments)
Download FASTA	Aligned sequences in FASTA
Download Newick	Guide-tree Newick
Download Distance Matrix	Pairwise distances as a file
Download Alignment Snapshot PNG	Picture of the visible alignment (JPEG or PDF if that format is selected under Settings)
Reduce to Contrafacts	Keeps only sequences that look like contrafacts of each other (hidden in concatenated mode)

JSON is the format to archive or share a ChantLab alignment. FASTA and Newick are for external tools.

5. Guide tree

Click **Guide Tree**. This is the similarity tree MAFFT used while aligning (not the later phylogenetic tree). Drag the card if it covers the sequences. Click **Guide Tree** again to hide it.

Word-based alignment does not offer a guide tree.

7. Alignment snapshot

Click **Download Alignment Snapshot PNG** (or **JPEG / PDF**, if that format is selected under **Settings**). The browser downloads a picture of the visible alignment.

Graduals

8. Sort by Cantus ID frequency and pick the top 100

Back on **Chant list**, open **Data sources**, check **Graduals** only, and **Save**.

Then check **Concatenated alignment**. Elements that share a source are joined, so each sequence consists of one source's versions of those melody types laid end to end. This allows you to compare melodies with the same Cantus IDs across sources.

Data sources

The result has one sequence per source (not 100 separate chants). Each sequence is that source's record of the selected Cantus IDs laid end to end. If a source is missing any Cantus ID, the corresponding segment is left without any notes, allowing you to compare only the melodies for which a record is available.

Save the alignment, then **Download Alignment Snapshot PNG**.

The screenshot shows the software interface with a modal dialog titled "Enter alignment name". The dialog contains a text input field with the value "ncatenated (docs) 1686" and a "Confirm" button. The background interface includes a top navigation bar with links like "Chant list", "Manage data", "Manage alignments", "Dashboard", "Settings", and "About". On the left, there are "Display options" (Show headers, Show text, Show colors, Show conservation, Segment words) and "Display mode" (Volpiano, Raw, 12 sequences, Notes, All). On the right, there are buttons for "Save", "Download Alignment JSON", "Download FASTA", "Download Newick", "Distance Matrix", "Download Distance Matrix", "Guide Tree", and "Download Alignment Snapshot PNG". A "Phylogenetic Analysis" button is also visible. The main area displays musical notation with lyrics.

This screenshot shows the same software interface as the previous one, but with the "Phylogenetic Analysis" button highlighted in pink. The modal dialog is no longer present. The interface elements, including the navigation bar, display options, and main musical notation area, remain the same.

10. Phylogenetic analysis

Click **Phylogenetic Analysis**. This needs **at least four** sequences. It runs MrBayes; the number of generations is set under **Settings**.

Phylogenetic Analysis

When it succeeds you get:

- the **Newick** string (**Copy** or **Download Newick**)
- **Download nexus.con.tre**, **Download MrBayes script**, **Download nexus alignment**
- an [LcyTree](#) frame: copy the Newick, then in the frame use **File** → **Enter tree directly...** and paste (the in-page **Help** button lists these steps)

The screenshot shows the IcyTree web application interface. At the top is a dark blue navigation bar with a home icon, links for 'Chant list', 'Manage data', 'Manage alignments', 'Dashboard', 'Settings', and 'About'. On the right side of the bar are a user ID 'docsguide882194', a 'Logout' button, and a search bar labeled 'Search icytree'. Below the navigation bar, the main content area is divided into two sections. The top section, titled 'Newick Phylogenetic Tree', contains a text box with a Newick tree string: `(D_Mbs_Clm_4303[&prob=1.00000000e+00,prob_stddev=0.00000000e+00,prob_range=`. To the right of this text box are four buttons: 'Download Newick', 'Download nexus.con.tre', 'Download MrBayes script', and 'Download nexus alignment'. Below the text box are 'Copy' and 'Help' buttons. The bottom section of the main content area is a large dashed box containing the text 'IcyTree' in a large blue font, followed by 'Drag and drop a tree file' and 'HERE' in a large blue font, and finally 'or load using the File menu'. Above this dashed box is a sub-navigation bar with buttons for 'File', 'Style', 'Search', 'Statistics', 'Help', and a tree icon.

11. Manage alignments

Open **Manage alignments**. Saved alignments are listed on the left.

- Select one and click **Show** to reopen the alignment page.
- Select one and click **Delete** to remove it from your account.

Manage alignments

☒ Graduals concatenated (docs) 1686

☐ Tracts pitch alignment (docs) 1686

Show Delete

Upload alignment

Alignment name

Choose File No file chosen

Upload

Help: Alignment Format

On the right, **Upload alignment** restores a file you previously downloaded with **Download Alignment JSON** on the alignment page. That file is a ChantLab alignment JSON, not a chant CSV.

1. Type an **Alignment name**.
2. Choose the `.json` file.
3. Click **Upload**.

The new name then appears in the list on the left, and you can **Show** it like any other saved alignment.
